CANADIAN SIP TRUNKING MARKET REPORT 2019 EDITION

TABLE OF CONTENTS

<u>Section</u>	<u>Page</u>
SECTION 1: INTRODUCTION & INDUSTRY BACKGROUND.....	1
1.1 Introduction.....	2
1.2 How SIP Trunking Works	3
1.3 Competitive Landscape.....	7
1.3.1 Service Providers	7
1.3.2 KTS/PBX/IP-PBX Manufacturers.....	8
1.3.3 Interconnects, Systems Integrators, and IT Service Providers	9
1.4 Types of SIP Trunking Services	10
1.4.1 Virtual Phone Line.....	10
1.4.2 Bring-Your-Own Broadband.....	10
1.4.3 PRI Replacement	12
1.4.4 MPLS and other Transport Protocols	12
1.5 Drivers of SIP Trunking Services	13
1.5.1 Benefits for Users	14
1.5.2 Benefits for Service Providers.....	18
1.6 Industry Challenges	19
1.6.1 Network Footprint Size	19
1.6.2 Foreign Numbers	20
1.6.3 SIP Interworking and Technology Choice	21
1.6.4 Large Customers Prefer Service Consolidation.....	22
1.6.5 The Challenge of the Cloud.....	23
 SECTION 2: MARKET OVERVIEW.....	 25
2.1 Market At-A-Glance	26
2.2 Market Overview	33

TABLE OF CONTENTS (cont'd)

<u>Section</u>	<u>Page</u>
2.2.1 Overall Market.....	33
2.2.2 Retail Market	34
2.2.3 Wholesale Market.....	35
SECTION 3: SERVICE PROVIDER PROFILES	37
Introduction.....	38
3.1 Allstream	38
3.2 Bell	43
3.3 BroadConnect.....	49
3.4 Cogeco.....	52
3.5 Comwave.....	55
3.6 Iristel.....	58
3.7 Rogers.....	61
3.8 SaskTel.....	64
3.9 Shaw	67
3.10 TELUS	69
3.11 ThinkTel	74
APPENDIX: SIP TRUNKING COMPANY ATTRIBUTE COMPARISON	78-81

LIST OF EXHIBITS

<u>Exhibit</u>	<u>Page</u>
2.1 Overall Industry Revenues by Service Provider, 2017-2021	26
2.2 Market Shares of Overall Revenues by Service Provider, 2017-2021	26
2.3 Total SIP Trunks by Service Provider, 2017-2021	27
2.4 Market Shares by Total SIP Trunks by Service Provider, 2017-2021	27
2.5 DIDs by Service Provider, 2017-2021	28
2.6 Market Shares of DIDs by Service Provider, 2017-2021	28
2.7 Retail Revenues by Service Provider, 2017-2021	29
2.8 Market Shares of Retail Revenues by Service Provider, 2017-2021	29
2.9 Retail SIP Trunks by Service Provider, 2017-2021	30
2.10 Market Shares of Retail SIP Trunks by Service Provider, 2017-2021	30
2.11 Wholesale Revenues by Service Provider, 2017-2021	31
2.12 Market Shares of Wholesale Revenues by Service Provider, 2017-2021	31
2.13 Wholesale SIP Trunks by Service Provider, 2017-2021	32
2.14 Market Shares by Wholesale SIP Trunks by Service Provider, 2017-2021	32
3.1 Allstream Results and Forecasts	38
3.2 Bell Results and Forecasts	43
3.3 BroadConnect Results and Forecasts	49
3.4 Cogeco Results and Forecasts	52
3.5 Comwave Results and Forecasts	55
3.6 Iristel Results and Forecasts	58
3.7 Rogers Results and Forecasts	61

3.10 TELUS Results and Forecasts	69
3.11 ThinkTel Results and Forecasts	74

CANADIAN SIP TRUNKING MARKET REPORT 2019 EDITION

Introduction

Over the last 15+ years, Session Initialization Protocol (SIP) has emerged from its Internet roots to become the signalling technology of choice for the control of real-time multimedia communication via private and public, wireline and wireless IP networks.

The SIP protocol was first used for presence (the ability to display your current availability to accept telephone calls and messages) and instant messaging because of its ability to easily set up real-time sessions. These Internet applications allow users to check each other's on-line status and converse by sending text messages back and forth.

However, SIP can also enable IP-PBX trunking, peer-to-peer IP telephony, video conferencing, unified communications and other telecommunications applications.

Of these, this report focuses on SIP trunking, which permits convergence of a firm's data and voice traffic — local, long-distance and internal branch-to-branch communications — over a single IP connection that provides access to the organization's wide area network, the Internet and the public switched telephone network (PSTN). This eliminates the need for separate voice and data network connections, offers significant potential savings when compared with multiple PRI (Primary Rate Interface) connections to the PSTN, and enables a plethora of IP-based applications to ride over the same facility.

This is NBI/Michael Sone Associates' seventh annual report on the Canadian market for SIP trunking services that examines the current state, size and composition of the market.

The report provides a separate breakdown for each of retail and wholesale revenues and channel volumes. The market for wholesale SIP services is made up of a variety of telecom providers, from those offering niche applications such as conference calling to others that provide SIP services but

lack reach in certain geographic regions. By far, the largest consumers of wholesale SIP services are the plethora of over-the-top VoIP providers that lack their own facilities and rely on others for the basic network elements and PSTN connectivity to facilitate their offerings.

There are multiple audiences for this report, including:

- ◆ Service providers currently offering, or considering the offering of, SIP trunking services;
- ◆ Networking equipment manufacturers offering business telephone systems including key systems, PBXs, and IP-PBXs;
- ◆ Interconnects that sell, install and service business telephone systems and associated network services; and,
- ◆ Other market participants focused on Internet, data and VoIP services such as cablecos, ISPs, ITSPs and VoIP service providers.

This report presents an examination of SIP trunking including, the role of signalling in telephony, industry background, the competitive landscape, drivers of SIP trunking, challenges experienced by service providers and customers related to SIP signalling, and the business rationale for the service. Market sizing based on revenues and volumes from 2017 to 2021 for both the retail and wholesale sectors is illustrated along with market shares and detailed qualitative & quantitative profiles of 11 leading providers of SIP trunking services active in the Canadian market.

As with all NBI/Michael Sone Associates reports, information has been gathered from primary sources. The information contained in this report is the result of numerous interviews, primarily with the SIP trunking service providers themselves.
