CANADIAN SIP TRUNKING MARKET REPORT 2020 EDITION

TABLE OF CONTENTS

<u>Section</u>	<u>Page</u>
SECTION 1: INTRODUCTION & INDUSTRY BACKGROUND.....	1
1.1 Introduction.....	2
1.2 How SIP Trunking Works	3
1.3 Competitive Landscape.....	4
1.3.1 Service Providers	4
1.3.2 KTS/PBX/IP-PBX Manufacturers.....	5
1.3.3 Interconnects, Systems Integrators, and IT Service Providers	6
1.4 Drivers of SIP Trunking Services	7
1.4.1 Benefits for Users	7
1.4.2 Benefits for Service Providers.....	11
1.5 Industry Challenges	12
1.5.1 Network Footprint Size	12
1.5.2 SIP Interworking and Technology Choice	13
1.5.3 Large Customers Prefer Service Consolidation.....	15
1.5.4 The Challenge of the Cloud.....	15
1.5.5 Big Tech – The Challenge and the Opportunity.....	16
1.5.6 COVID-19 as a Driver of SIP Trunking.....	17
 SECTION 2: MARKET OVERVIEW.....	 18
2.1 Market At-A-Glance	19
2.2 Market Overview	26
2.2.1 Overall Market.....	26
2.2.2 Retail Market	27
2.2.3 Wholesale Market	28

SECTION 3: SERVICE PROVIDER PROFILES	30
Introduction.....	31
3.1 Allstream	31
3.2 Bell	36
3.3 Comwave.....	42
3.4 Iristel.....	45
3.5 Rogers (& ZipTel).....	48
3.6 SaskTel.....	52
3.7 Shaw	55
3.8 TELUS	57
3.8.1 GoCo	61
3.9 ThinkTel	64
APPENDIX: SIP TRUNKING COMPANY ATTRIBUTE COMPARISON	68-70

CANADIAN SIP TRUNKING MARKET REPORT 2020 EDITION

LIST OF EXHIBITS

<u>Exhibit</u>	<u>Page</u>
2.1 Overall Industry Revenue by Service Provider, 2018-2022	19
2.2 Market Shares of Overall Revenue by Service Provider, 2018-2022	19
2.3 Total SIP Trunks by Service Provider, 2018-2022	20
2.4 Market Shares by Total SIP Trunks by Service Provider, 2018-2022.....	20
2.5 Total DIDs by Service Provider, 2018-2022	21
2.6 Market Shares of Total DIDs by Service Provider, 2018-2022.....	21
2.7 Retail Revenue by Service Provider, 2018-2022	22
2.8 Market Shares of Retail Revenue by Service Provider, 2018-2022	22
2.9 Retail SIP Trunks by Service Provider, 2018-2022.....	23
2.10 Market Shares of Retail SIP Trunks by Service Provider, 2018-2022	23
2.11 Wholesale Revenue by Service Provider, 2018-2022	24
2.12 Market Shares of Wholesale Revenue by Service Provider, 2018-2022	24
2.13 Wholesale SIP Trunks by Service Provider, 2018-2022	25
2.14 Market Shares of Wholesale SIP Trunks by Service Provider, 2018-2022	25
3.1 Allstream Results and Forecasts	31
3.2 Bell Results and Forecasts	36
3.3 Comwave Results and Forecasts.....	42
3.4 Iristel Results and Forecasts.....	45
3.5 Rogers (& ZipTel) Results and Forecasts.....	48
3.6 SaskTel Results and Forecasts	52
3.7 Shaw Results and Forecasts	55
3.8 TELUS Results and Forecasts	57
3.9 ThinkTel Results and Forecasts	64

CANADIAN SIP TRUNKING MARKET REPORT 2020 EDITION

Introduction

Over the last 15+ years, Session Initialization Protocol (SIP) has emerged from its Internet roots to become the signalling technology of choice for the control of real-time multimedia communication via private and public, wireline and wireless IP networks.

The SIP protocol was first used for presence (the ability to display your current availability to accept calls and messages) and instant messaging because of its ability to easily set up real-time sessions. These Internet applications allow users to check each other's on-line status and converse by sending text messages back and forth.

However, SIP can also enable IP-PBX trunking, peer-to-peer IP telephony, video conferencing, unified communications and other telecommunications applications.

Of these, this report focuses on SIP trunking, which permits convergence of a firm's data and voice traffic — local, long-distance and internal branch-to-branch communications — over a single IP connection that provides access to the organization's wide area network, the Internet and the public switched telephone network (PSTN). This eliminates the need for separate voice and data network connections, offers significant potential savings when compared with multiple PRI (Primary Rate Interface) connections to the PSTN, and enables a plethora of IP-based applications to ride over the same facility.

This is NBI/Michael Sone Associates' eighth annual report on the Canadian market for SIP trunking services that examines the current state, size and composition of the market.

The report provides a separate breakdown for each of retail and wholesale revenues and channel volumes. The market for wholesale SIP services is made up of a variety of telecom providers, from

those offering niche applications such as conference calling to others that provide SIP services but lack reach in certain geographic regions. By far, the largest consumers of wholesale SIP services are the plethora of over-the-top VoIP providers that lack their own facilities and rely on others for the basic network elements and PSTN connectivity to facilitate their offerings.

There are multiple audiences for this report, including:

- ◆ Service providers currently offering, or considering the offering of, SIP trunking services;
- ◆ Networking equipment manufacturers offering business telephone systems including key systems, PBXs, and IP-PBXs;
- ◆ Interconnects that sell, install and service business telephone systems and associated network services; and,
- ◆ Other market participants focused on Internet, data and VoIP services such as cablecos, ISPs, ITSPs and VoIP service providers.

This report is organized into three sections.

Section 1, "*Introduction & Industry Background*", presents an introduction to SIP trunking, the role of signalling in telephony, industry background, challenges experienced by service providers and customers related to SIP signalling, and the business rationale for SIP trunking. This has changed little from previous editions.

Section 2, "*Market Overview*", shows the change in market revenues and volumes from 2018 to 2022.

Section 3, "*Service Provider Profiles*", presents descriptions of the leading providers of SIP trunking services active in the Canadian market.

As with all NBI/Michael Sone Associates reports, information has been gathered from primary sources. The information contained in this report is the result of numerous interviews, primarily with the SIP trunking service providers themselves.
